DIY Paper Clapboard

Materials:

- Black and white cardstock
- Scissors
- Glue sticks
- Brads (2-pronged metal fasteners)

Instructions:

1. Cut 8 ½ inch squares of black cardstock
2. Print out the clapboard templates (see below) on white cardstock
Note: The children can complete everything after this step on their own
3. Cut out the individual pieces of the template
4. Glue the white rhombuses across the clapboard “handle” (the long black rectangle piece) to make stripes, making sure to leave the small white circle exposed
5. Glue the label near the bottom of the main square piece
6. Align the handle across the top of the main square so that approximately half of the handle overlaps onto the square, with the white circle at the bottom left of the handle
7. Push the brad through the two pieces of paper, using the white circle as a guide, and separate the prongs to secure the pieces together
8. Fill out the label with the details of a favorite movie or an original production of your own
